1. Based on the attorney's remarks, the 101 rejection is reversed.

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

As per Claims 1 and 11.

The present invention is directed to a "method for developing intellectual property assets". Each independent claim identifies the uniquely distinct features "collecting one or more IP assets in accordance with a characterization said characterization being features of interest to potential investors; determining an initial market value for the collection in accordance with a plurality of uses for the assets so characterized; holding the collection in an investment trust (IT); executing an on-line auction of shares in said IT, wherein each of a plurality of investors contribute in return for a share of said IT; an opening bid in said auction for said shares being in proportion to said determined initial market value, exploiting the collection, using said contributions to make markets for type said plurality of uses and obtain revenue therefrom, and distributing profits to said

investors". The closest prior art, Elliott(2001/0042034 A1) , disclose a method of securitization that includes a sale and leaseback situation and, either singularly or in combination, fails to anticipate or render the above underlined limitations obvious.

The claims which depend from the above allowed claims are allowed based on their dependencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
